

ELOK 9-SERIES

*With Inbuilt
Wi-Fi Gateway*

Available Now!

Inbuilt Wi-Fi Compatability

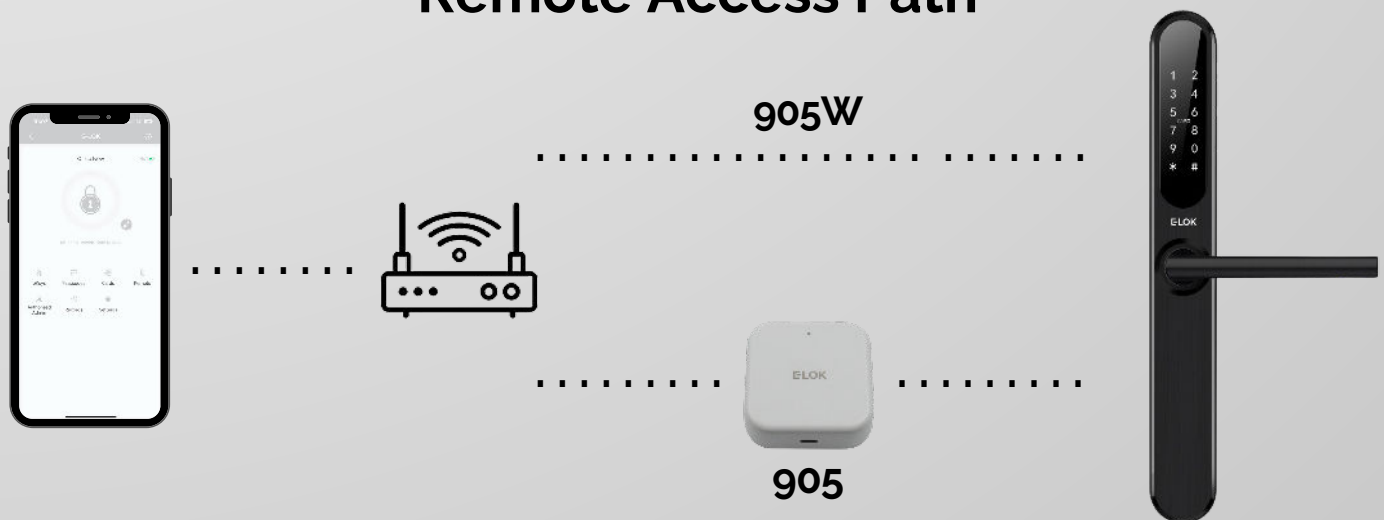

Experience the convenience of the E-LOK 905W Inbuilt Wi-Fi.

With this technology now available in the 9-Series Hardware, you have the capability to control the lock remotely without the need of a separate Gateway unit. This minimizes fuss, and product bulk, as well as streamlines the whole experience for the end user.

The 905W still comes in 4 different finish options of Black, Stainless Steel, Gunmetal, and Satin Brass, and still runs off the same trusty E-LOK App.

This solution is ideal for home owners wanting a single E-LOK on their house, where they need simplicity and functionality for a reasonable price.
